SUNGIL - FLEXIBLE MICROCOUPLING, SFC

SFC-29

- Absorbs large shaft displacements
- Excellent for high shock loads and vibration
- Low moment of inertia
- For 4mm to 16mm diameter shafts
- Supplied machined to shaft requirements

PRODUCT DESCRIPTION

The SFC series is an enormously flexible shaft coupling from Sungil which is ideal in the event of large displacements radially and/or axially.

It is extremely easy to apply thanks to its innovative design.

The SFC series is available for shaft sizes from 6mm up to 12mm as standard.

TECHNICAL DATA

Angle deviation	10 °
Axial displacement	1.5 mm
Parallel displacement	2 mm
Torque max	0.35
