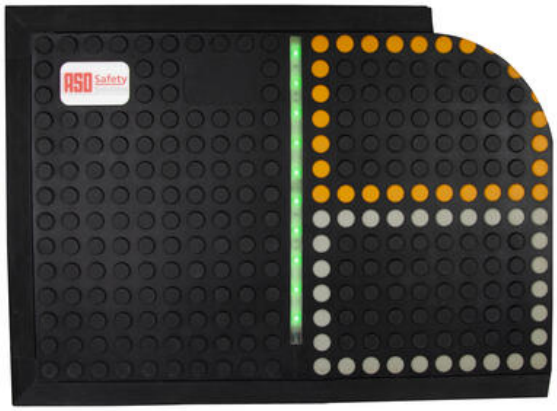
ASO SAFETY MATS

1602-2820
Safety mat, 14-1T4.0-NP, 750mm x 1000mm

- Resistant to chemicals and dust
- IP65
- Can handle up to 2000 N
- Long life, up to 6 million activations
- Customisable as required



PRODUCT DESCRIPTION

ASO's SENTIR safety mats are used to protect dangerous areas in industry and production. Stepping on the mat triggers an immediate "stop" to prevent people from getting too close to, say, a machine and injuring themselves.

A single composite unit in polyurethane guarantees impermeability to oils, water and dirt. The surface is also designed with patterns to minimize the risk of slipping. Surfaces in aluminum or high-quality steel can be used in areas where high mechanical demands are placed on the safety mat.

Customized solutions are a great opportunity and it is possible to get the safety mat in different shapes and colors, with different breaking zones, with or without led lighting, built-in ramp and much more. Get in touch with us and we will come up with a solution just for you!

TECHNICAL DATA

Activation weight min	ca 150 N
Connection	M8
Current max	0.1 A
IP class	IP65
Material mat	PUR
Response time	25 ms
Supply voltage	24 V
Temperature operational max	55 °C
Temperature operational min	-10 °C
Weight	19.6 kg
