NEO WALL SOCKETS

FW110306CC
Wall 2P+E Top Entry IP44 230V Blue

- Side-opening housing for safer, faster installation
- Spring-clamp or screw terminal options for flexible wiring preferences.
- Automatic internal strain relief for secure long-term cable retention.
- Multiple cable entry points supporting versatile mounting.
- High durability and impact resistance for industrial environments.

PRODUCT DESCRIPTION

The Walther NEO wall sockets are designed for fast, safe and reliable power distribution in industrial environments. Their modern housing design allows the enclosure to open sideways for easier, safer installation. With optional screwless spring-clamp terminals, wiring is quick and maintenance-free, while versions with screw terminals are available for traditional installations.
An internal strain-relief mechanism ensures secure cable retention, and multiple cable entry options allow flexible mounting. Engineered with durable materials and strong ingress protection, NEO wall sockets provide long-lasting performance in demanding applications.
