NEO WALL APPLIANCE INLETS

FW630304SK
Straight Panel 2P+E 110V Yellow Screw

- Reliable power entry point for equipment and machinery.
- Compact, durable construction suited to harsh environments.
- Fast, secure wiring with both screwless and screw options.
- Stable mounting design for vibration-prone or mobile equipment.
- Strong strain relief to ensure safe, lasting connections.

PRODUCT DESCRIPTION

NEO wall appliance inlets provide a dependable solution for supplying equipment, machinery or mobile units with external power. Built with the same rugged housing and heat-resistant components used across the NEO range, these inlets ensure secure connections and long service life. Their design supports fast wiring, reliable strain relief and stable mounting on flat surfaces or equipment housings. Compact, robust and simple to install, they offer a durable interface for connecting machines to power safely and efficiently.
