

LOCK 150

TBL15

Tosibox Lock 150

- Up to 10 Mb/s VPN throughput
- WAN port & WLAN
- Supports 3G/4G modem
- Up to 10 concurrent connections

PRODUCT DESCRIPTION

TOSIBOX® Lock 150 is an industrial router with firewall and easy Plug & Go™ connectivity. It serves as an endpoint for secure remote connections. IoT devices connected to the Lock can be securely accessed over the Internet and most LAN and WAN networks through an encrypted VPN connection.

TOSIBOX® Lock 150 is compatible with all existing TOSIBOX® products. Modularity of the products enables easy and fast extension of networks.

- Patented TOSIBOX® Plug & Go™ connection method takes you out of the box and into use in less than 5 minutes, without the need for software installations, network configurations or special IT skills
- NAT and firewall friendly
- VPN throughput up to 10 Mbit/s, end-to-end encryption between TOSIBOX® devices
- Performing at the highest security levels in the industry
- Up to 10 concurrent VPN connections
- Audited and patented security
- Reliability with TosiOnline™ automatic reconnection of dropped connections
- Compact physical size for space conscious environments

TECHNICAL DATA

TECHNICAL DATA

WAN port	10/100 Mbit/s
LAN port	3 x 10/100 Mbit/s
Support for 3G/4G USB-modem	Yes
VPN throughput	Up to 10 Mb/s

VPN encryption	Blowfish 128 bit CBC, AES 128/192/256 bit CBC
Authentication of VPN connection	PKI, 3072 bit RCA
Automatic reconnect of connection	Yes
Parallel VPN connections	Max 10
Supply voltage	12-24 V DC
Power consumption	7,2 W
Height	35,5 mm
Length	132 mm
Width	99 mm
