LED PRESET COUNTER CODIX 560

6.560.010.307
CODIX 560 LED PRESET COUNT 10-30VDC RS485

- Multifunctional device combining counter, tachometer, and hour meter functionalities
- User-friendly interface with large keys for comfortable operation, even with gloves
- Simultaneous display of actual value, presets, batch numbers, or total sums
- Multi-range power supply for AC or DC
- Robust housing with IP65 protection for durability in harsh environments

PRODUCT DESCRIPTION

The Codix 560 offers a user-friendly interface with intuitive navigation, making it easy to configure and operate. The large keys allow for comfortable interaction, and they can even be operated while wearing gloves, ensuring usability in diverse working conditions.
One of the standout features of the Codix 560 is its versatility. It serves as a multifunctional device, combining the functionalities of a counter, tachometer, and hour meter in one compact unit. This eliminates the need for multiple devices and simplifies the setup process.
The display provides real-time information, allowing for simultaneous monitoring of the actual value and various parameters such as presets, batch numbers, or total sums. This comprehensive display capability enables quick and accurate data interpretation.

Furthermore, the Codix 560 offers flexible scaling options, allowing users to customize the display based on their specific requirements. With adjustable scaling using multiplier or dividing factors, it can display values in different units, such as position in 1/10 mm or speed in RPM, enhancing its adaptability to various applications.
Durability and reliability are key attributes of the Codix 560. It features a robust housing with IP65 protection, ensuring resistance to dust and water ingress. This makes it suitable for use in demanding industrial environments where exposure to harsh conditions is common.
