

LED PULSE COUNTER, CODIX 52C

6.52C.012.300

Counter Pulse double 24x48mm 10-30VDC

- 10-30VDC
- Dual counting inputs
- 6 Digit display
- PNP/NPN input

PRODUCT DESCRIPTION

Total counter with double separate inputs. LED display with 6 x intensive digits, 8 mm. The housing is to IP65. Cable connection with screw terminal. The counter comes with clamps for screw or clamp fitting, gaskets and separate front frames to fit 25 x 50 mm panel holes.

The counter's reset button can be programmed separately for both counter inputs. The reset function can also be disengaged. The counter senses pulses just 16 ms after switching on, so there is no risk of missed pulses even if the motor is switched on at the same time, for example.
