## **ORIENTAL MOTOR - 90MM 40W INDUCTION MOTOR WITH RIGHT ANGLE HOLLOW SHAFT GEARBOX**

5IK40GN-AW2U+5GN100RH 90mm induction motor 40W 110/115V lead wire 1ph 60Hz + 90mm Right angle hollow shaft gearbox 100:1

- 0.39 to 10 Nm output torque
- Low noise 4 pole motor
- Single phase constant speed or three phase for inverter driven speed control
- . UL, CSA, CE marking
- Voltage options for round the world use.

Motor and Gearhead ship separately.

## PRODUCT DESCRIPTION

Standard induction AC motors from Oriental Motor include single and three phase powered motors.

The single phase motor uses a capacitor for start, with options covering many worldwide voltages.

A three-phase motor connects using an inverter drive, for speed control and high-torque available even at low speeds.

These high-performance motors have little speed reduction even under high loads, ensuring that stable speed control is possible

Suitable for continuos operation over a long life - typically 10,000 hours+ and with a compact construction, they are used on many applications.

## Typical uses

- Conveyors
- · Packing machines
- · Label and printing machines
- Food processing machinery
- Pumps
