PRODUCT DESCRIPTION

The HYGHSPIN Hopper is an addition to the worldwide tried and tested HYGHSPIN series of Twin Screw Pumps made of stainless steel. The innovative twin screw pump with a funnel opening is capable of transporting products with viscosities of up to 1000 Pas. Its conveyor screws are extended so that they can induct non-flow capable products below the inlet funnel in a similar principle to an extruder and then feed them into the pump chamber. This ensures a particularly gentle handling - an external extruder can be completely dispensed with.

The HYGHSPIN Hopper therefore provides a very attractive 3-in-1 solution: Feeding, conveying and cleaning take place in only one component. It is available in block design or with free shaft end.
