THK - HSR RAIL AND BLOCKS

HSR 20LR

- Same carrying capacity in all 4 axis.
- Global standard
- Rail cut to customer specific length
- Available with corrosion resistant coating.

PRODUCT DESCRIPTION

A global standard ball bearing contact between rail and block, where each bearing channel is positioned at a 45 ° contact angle so that the nominal loads are uniformly aligned in four directions (radial, reverse radial and lateral).

We can supply as blocks and rail seperately. Rail can be cut to customer specific lengths.

TECHNICAL DATA

Dynamic load	239 kN
Height	30 mm
Length	90 mm
Static load	358 kN
Width	44 mm
