THK - HSR RAIL AND BLOCKS

HSR 25LR

- Same carrying capacity in all 4 axis.
- Global standard
- Rail cut to customer specific length
- Available with corrosion resistant coating.

PRODUCT DESCRIPTION

A global standard ball bearing contact between rail and block, where each bearing channel is positioned at a 45 ° contact angle so that the nominal loads are uniformly aligned in four directions (radial, reverse radial and lateral).

We can supply as blocks and rail seperately. Rail can be cut to customer specific lengths.

TECHNICAL DATA

Dynamic load	352 kN
Height	40 mm
Length	1022 mm
Static load	516 kN
Width	48 mm
