

THK - HSR RAIL AND BLOCKS

HSR 25LR

- Same carrying capacity in all 4 axis.
- Global standard
- Rail cut to customer specific length
- Available with corrosion resistant coating.

PRODUCT DESCRIPTION

A global standard ball bearing contact between rail and block, where each bearing channel is positioned at a 45 ° contact angle so that the nominal loads are uniformly aligned in four directions (radial, reverse radial and lateral).

We can supply as blocks and rail separately. Rail can be cut to customer specific lengths.

TECHNICAL DATA

Dynamic load	35.2 kN
Height	40 mm
Length	102.2 mm
Static load	51.6 kN
Width	48 mm
