

THK - HSR RAIL AND BLOCKS

HSR 85R

- Same carrying capacity in all 4 axis.
- Global standard
- Rail cut to customer specific length
- Available with corrosion resistant coating.

PRODUCT DESCRIPTION

A global standard ball bearing contact between rail and block, where each bearing channel is positioned at a 45 ° contact angle so that the nominal loads are uniformly aligned in four directions (radial, reverse radial and lateral).

We can supply as blocks and rail separately. Rail can be cut to customer specific lengths.

TECHNICAL DATA

Dynamic load	304 kN
Height	110 mm
Length	245.6 mm
Static load	355 kN
Width	156 mm
