THK - HSR RAIL AND BLOCKS

HSR 85LR

- Same carrying capacity in all 4 axis.
- Global standard
- Rail cut to customer specific length
- Available with corrosion resistant coating.

PRODUCT DESCRIPTION

A global standard ball bearing contact between rail and block, where each bearing channel is positioned at a 45 ° contact angle so that the nominal loads are uniformly aligned in four directions (radial, reverse radial and lateral).

We can supply as blocks and rail seperately. Rail can be cut to customer specific lengths.

TECHNICAL DATA

Dynamic load	367 kN
Height	110 mm
Length	303 mm
Static load	464 kN
Width	156 mm
