THK - SR RAIL AND BLOCKS

SR 25 WY/WMY

- High precision
- Quiet running
- High loads in horizontal loading

PRODUCT DESCRIPTION

THK's rail type SR is a compactly designed range that has a low section height and a ball contact structure that can handle large loads in the radial direction.

This means that this rail and block system is optimal for horizontal loading.

Please specify rail length when enquiring.

TECHNICAL DATA

Dynamic load	20.3 kN
Height	33 mm
Length	83 mm
Static load	39.5 kN
Width	48 mm
