THK - SR RAIL AND BLOCKS

SR 35 V/VM

- High precision
- Quiet running
- High loads in horizontal loading

PRODUCT DESCRIPTION

THK's rail type SR is a compactly designed range that has a low section height and a ball contact structure that can handle large loads in the radial direction.

This means that this rail and block system is optimal for horizontal loading.

Please specify rail length when enquiring.

TECHNICAL DATA

Dynamic load	23.8 kN
Height	48 mm
Length	77.6 mm
Static load	44.1 kN
Width	70 mm
