THK - SR RAIL AND BLOCKS

SR 55 W

- High precision
- Quiet running
- High loads in horizontal loading

PRODUCT DESCRIPTION

THK's rail type SR is a compactly designed range that has a low section height and a ball contact structure that can handle large loads in the radial direction.

This means that this rail and block system is optimal for horizontal loading.

Please specify rail length when enquiring.

TECHNICAL DATA

Dynamic load	89.1 kN
Height	68 mm
Length	156 mm
Static load	157 kN
Width	100 mm
