THK - SR RAIL AND BLOCKS

SR 70 T

- High precision
- Quiet running
- High loads in horizontal loading

PRODUCT DESCRIPTION

THK's rail type SR is a compactly designed range that has a low section height and a ball contact structure that can handle large loads in the radial direction.

This means that this rail and block system is optimal for horizontal loading.

Please specify rail length when enquiring.

TECHNICAL DATA

Dynamic load	156 kN
Height	85 mm
Length	194.6 mm
Static load	266 kN
Width	126 mm
