## THK - LBH - TORQUE BALL BUSHING

LBH50

- Compact torque bushing with a straight rectangular shoulder nut.
- · High torque capability
- · High speed and quiet
- Long maintenance intervals

## PRODUCT DESCRIPTION

A rigid rectangular spindle nut does not require a housing and can be mounted directly on the machine body.

This results in a compact, very stable linear control system.

The spline shaft has three pairs of precision machined bearing tracks, 120° apart.

The ball lines are held in place and circulate through a ball holder inside the bushing.

This also holds the balls in place if the bushing should be pulled off the shaft.

## **TECHNICAL DATA**

| Dynamic load | 55.1 kN |
|--------------|---------|
| Height       | 88 mm   |
| Length       | 115 mm  |
| Static load  | 94.1 kN |
| Width        | 100 mm  |
