ANTI-ROTATION BRACKET

271502
Anti-rotation bracket, Black coated

- For 90° lock
- Hole pattern Ø23 mm
- For mounting in wood or fiberglass
- Fastens in 2x Ø4mm holes

PRODUCT DESCRIPTION

To enable the installation of 90° locks with hole punching "Combi" also in round holes. Suitable for mounting such locks in e.g. doors made of wood, fiberglass, etc. The washer is attached by drilling 2 Ø 4 mm holes in the door on each side of the mounting hole (Ø 23 mm), whereby the washer is pressed in from the inside of the door. Finally, the lock is mounted in the "Combi" hole punch.

TECHNICAL DATA

Material	Zinc, black powder coated
