PRODUCT DESCRIPTION

The FPS300 is an industrialgrade power supply for 3-phase networks and is incorporated in a rugged wall- mount housing with IP65/67 protection.
It provides two to four stabilized outputs that are galvanically separated from the input.
The negative potential of the outputs is permanently connected to PE within the unit.
The most outstanding features of the FPS series are the compact size, the wide operational temperature range, the extremely low input inrush current and the very high efficiencies, which are achieved by various design technologies.
Large sized output capacitors can absorb and store regenerative energy from breaking motors.
