50-16000-220R
AC Line Cord, 1.8m, Grounded, Three-Prong, CEE 7/7 plug

- Ethernet Cables
- Power Cables
- USB Cables
- Light Control Cables
- Power Supply Equipment

PRODUCT DESCRIPTION

Zebra's VS and FS Smart Cameras are designed with flexible power options to make installation simple across a wide range of applications. Customers can choose between standard 24V power supplies for fixed setups or convenient Power over Ethernet (PoE) options, which allow both power and data to run over a single cable. The compact FS10 also offers USB-C connectivity, making it easy to set up in tight spaces or for quick PC connections. With these choices, businesses can select the power method that best fits their production line, whether for high-speed conveyor systems, robotic automation, or smaller workstations.

Zebra provides durable industrial-grade cables that ensure reliable performance in challenging environments. The VS and FS cameras support rugged M12 Ethernet and power connections that are built to withstand dust, moisture, and vibration, while the FS10 uses a secure USB-C connection. This makes them suitable for a wide range of industries, from manufacturing and packaging to logistics, where dependable vision systems are essential. With easy installation options and versatile cabling, Zebra's smart cameras can be seamlessly integrated into existing operations, helping customers get up and running quickly with confidence.
