CAPACITIVE LEVEL SENSOR - SCV SERIES

CAPACITIVE LEVEL SCV

- No moving parts
- PTFE coated electrode
- Hermetic construction, polyurethane resin
- Minimum degree of protection IP65

PRODUCT DESCRIPTION

The capacitive probes, SCV series, are a good solution to control the level of liquids such as water, oil, gas and solids such as powders and granular materials. The probes are available in different lengths and their construction has been suitably designed to ensure high operational reliability in difficult conditions, such as those found on industrial plants.
