PRODUCT DESCRIPTION

The **P30H measuring transducer** has been developed for d.c network applications found in such industries as photovoltaic, railway and telecoms,

P30H measures and records d.c current, voltage, power energy and other d.c parameters.

The unit is available in 3 versions

- basic
- with SD/SDHC card
- Ethernet with built in www.server

This unit can be easily interfaced into existing systems to provide a complete solution to your d.c measurement requirements.

The clear LCD display shows the measured values and the status of the alarm outputs. The unit can be programmed from the front panel buttons or via a PC using the free e-Con software.
