

MIDWEST OPTICAL BN740 NARROW BANDPASS

F/BN740-C

Bandpassfilter - narrow, 740nm, for C-Mount

- Near-IR bandpass filter
- Work area 720-770 nm
- For IR LED

PRODUCT DESCRIPTION

Midwest Optical Systems bandpass filters are ideal for use in combination with LED or laser diode lighting. These filters consist of a precision polished glass filter with an anti-reflex coated surface. They are more rough, thinner, less angular and have a much higher transmission than conventional filters. Use of bandpass filters improves the contrast and often eliminates unwanted effects of disturbing ambient lighting.

TECHNICAL DATA

Filter thread (thread diameter x pitch)

C-Mount
