MIDWEST OPTICAL PR032 LINEAR POLARIZING FILTER

F/PR032-C
Filter - Linear polariser 32nm, C

- Linear polarizing, rotating with locking screw
- Work area 400-700 nm
- Reduces visibly shiny

PRODUCT DESCRIPTION

Polarizing filters only release visible light into a polarizing plane. These filters are used to remove glare from highly reflective surfaces. Standard versions include linear, circular and polarizing filters for IR in all common dimensions. There are also larger sizes, laminated glass and polarizing sheets for mounting in front of, for example, a light source.

TECHNICAL DATA

Filter thread (thread diameter x pitch)	C-mount
