ADJUSTABLE HATCH SUPPORT

552304-1
bushing for telescopic hatch support, order 2 per support

- Adjustable positions
- Universal model
- Left or right mounting
- Steel, Zinc coated

PRODUCT DESCRIPTION

Telescopic door support. The hatch support can hold the hatch or door open in several different positions. To close the door, the door is opened to the maximum position, which releases the latch so that the door support can be pushed together to its closed position. Universal left and right mounting.
Options such as mounting angle or bushings are delivered separately. The bushings are placed in the door support's two fastening holes and reduce friction and protect the door support against wear. The bushings can be used both with and without a mounting bracket.

TECHNICAL DATA

Material	Zinc-plated steel
