- Four Gigabit Ethernet ports deliver speeds up to 1000 Mbps
- Provided DIN rail clip ensures firm installation on any industrial application
- TosiOnline automatic reconnection of dropped connections
- Durable aluminium alloy shell, DIN rail attachment

### PRODUCT DESCRIPTION

- High VPN throughput
- 4 Gigabit ethernet ports delivering speeds of up to 1000MB/s
- IP30rating
- Din rail mounted

TOSIBOX ® 610 is an industrial router that creates secure remote acces for your devices.
You can easily create a secure remote connection to your PLC, operator panels, cameras or computers without having to open ports in the firewall.

TOSIBOX ® 610 is suitable for those who need higher data transfer speeds but do not require wireless networking capabilities. With a VPN speed of 70 MB/s, the 600 series is perfect for those who want to be able to access devices such as camerasand other devicesremotely.

The 610 from TOSIBOX ® usse the same simple software to get started and create a connection, but is paired differently to the Lock box. The pairing is done via a "Remote Matching" function.

Tosibox 610 is also available as a starter kit which includes 1 physical key and 1 soft key.
