MOBILE ROUTERS

RUT

RUT241210000
4G/LTE Router with Wi-Fi and Ethernet and drop back - ESIM Version

- Support 4G LTE, 3G and 2G connections
- Most models have integrated Wi-Fi support, which enables wireless network sharing
- Teltonika devices support remote management, which enables network monitoring and device updates remotely
- High-quality and durable materials guarantee that the routers work reliably even in demanding environments
- eSim option

PRODUCT DESCRIPTION

Teltonika is especially known for its mobile routers, which are popular in various industries and applications, such as AGV's, smart traffic, public transport, energy management, M2M and security solutions. Their range of mobile routers includes several models designed to provide reliable and fast connections even in challenging conditions
