

M12 CONNECTION CABLES

7000-12021-6140030

M12 male 0° A-cod. with cable PVC 4x0.34 bk UL/CSA
0.3m

- 4 and 5 pole connectors
- PUR or PVC
- Straight or 90°
- Various lengths available

PRODUCT DESCRIPTION

M12 connection cables are a vital component in industrial automation, control systems, and machine connectivity. These cables feature a robust and secure circular connector design, making them ideal for use in demanding environments where reliability and durability are crucial. M12 cables are commonly used to connect sensors, actuators, and other devices in applications such as factory automation, robotics, transportation, and process control. Known for their high-performance capabilities, M12 cables are designed to withstand harsh conditions, including exposure to moisture, dust, chemicals, and mechanical stress. With their standardised connection system, M12 cables provide reliable power and data transmission, ensuring optimal functionality and efficient operation across a variety of industrial settings.
