

M8 FIELD WIREABLE CONNECTORS

7000-08331-0000000

M8 male 0° A-cod. IDC 3-pol., 0,14 - 0,34mm², 2,5 - 5,1mm

- 3 and 4 pole connectors
- Screw Terminals
- IP67 protection
- Male or female

PRODUCT DESCRIPTION

M8 field wireable connectors are compact, reliable, and versatile connection solutions widely used in industrial automation and control systems. Designed for easy on-site assembly, these connectors allow users to wire them directly to cables, providing flexibility and customisation in the field. The M8 connectors are known for their robust, secure design, ensuring reliable power and signal transmission even in demanding environments. They are often used for connecting sensors, actuators, and other devices in applications where space is limited, and durability is essential. With excellent resistance to factors like moisture, dust, and vibrations, M8 field wireable connectors are ideal for industrial settings such as manufacturing, robotics, and process control. Their ease of use, coupled with their ability to withstand harsh conditions, makes them an indispensable solution for ensuring efficient, long-lasting connections in modern automation systems.
