

FORM A FIELD WIREABLE CONNECTORS

7000-29001-0000000

SVS VALVE PLUG FORM A 18MM FIELD-WIREABLE

24V LED+Z-Diode M16x1.5

- Form A (18mm) connectors
- Models available with LED indicator
- Plastic housing
- Good resistance against chemicals and oils

PRODUCT DESCRIPTION

Form A field wireable connectors are a category of electrical connectors designed to facilitate secure and reliable connections for a wide range of industrial, commercial, and residential applications. These connectors are particularly valued for their ease of installation, versatility, and ability to handle diverse wiring configurations in challenging environments. Often used in applications where quick, on-site wiring is necessary, Form A connectors offer a straightforward method for connecting conductors, ensuring proper electrical performance while minimizing the need for specialised tools or advanced technical skills.

The term "Form A" typically refers to a specific style of connector designed to meet standard configurations, making it easier to integrate into existing systems. Field wireable connectors of this type are commonly utilised in industries such as automation, control systems, and communications, where durability and flexibility in wiring are crucial. By offering customisable solutions for different cable sizes and types, Form A field wireable connectors provide essential benefits like simplified maintenance, reduced downtime, and enhanced operational efficiency.
