PRODUCT DESCRIPTION

IDEM's LSPS-R range of Plastic Body Safety Limit Switches with Manual Reset are designed to be mounted for position sensing of moving applications, e.g. guard doors, conveyors, machine beds, elevators.

Operation

Operation of IDEM Safety Limit Switches is achieved by a sliding actuation of the moving object to cause deflection of the switch plungers, rollers or levers. In addition to the standard LSPS switch they are equipped with a manual reset which needs to be operated after the lock is engaged.
