PRODUCT DESCRIPTION

The Sony Alpha 7R V (ILCE-7RM5) is a high-performance full-frame mirrorless camera designed for professional photographers and videographers. It boasts a 61MP Exmor R CMOS sensor for exceptional image detail and dynamic range, paired with a powerful BIONZ XR processor for fast, responsive performance. The camera features advanced autofocus with 759 phase-detection points and 567 contrast-detection points, ensuring precise subject tracking. Its 5-axis in-body image stabilization provides sharp, stable shots even in challenging conditions. With 8K video recording, a 4K 120p mode, and a high-resolution 3.2-inch LCD touchscreen, the Alpha 7R V is equipped to handle a wide range of creative and technical demands. Its robust build and intuitive interface make it a versatile tool for capturing stunning visuals with ease.
