PRODUCT DESCRIPTION

FS20 makes it easy to track every item as it moves through production, storage and delivery. The FS20 quickly scans barcodes on components moving through your assembly line, ensuring the right part is used at the right time. That in itself enables rapid recalls of products containing defective parts. The scanner can also be used to quickly make a stock inventory or check that the right goods are sent to the right customer.
Whatever you want to track, the FS20 makes it easy.
