SUNGIL - OLDHAM COUPLING, SOH

SOHM-32C

- Excellent performance for shaft displacements and angular deviations
- Low bearing stress
- 1 - 65 Nm, up to 8 000 rpm
- For 1mm to 35mm diameter shafts
- Supplied machined to shaft requirements

PRODUCT DESCRIPTION

The Oldham coupling from Sungil is a shaft coupling comprising three elements.

These transmit the torque whilst puting low stress on bearings even with angular deviations or parallel and axial displacements between the shafts.

TECHNICAL DATA

Parallel displacement	2.5 mm
Torque max	14
Angle deviation	2 °
Axial displacement	0.2 mm
