

## SUNGIL - OLDHAM COUPLING, SOH

SOH-16S

- Excellent performance for shaft displacements and angular deviations
- Low bearing stress
- 1 - 65 Nm, up to 8 000 rpm
- For 1mm to 35mm diameter shafts
- Supplied machined to shaft requirements

### PRODUCT DESCRIPTION

The Oldham coupling from Sungil is a shaft coupling comprising three elements.

These transmit the torque whilst putting low stress on bearings even with angular deviations or parallel and axial displacements between the shafts.

### TECHNICAL DATA

Angle deviation	2 °
Axial displacement	0.1 mm
Parallel displacement	1 mm
Torque max	2
