

## SUNGIL - OLDHAM COUPLING, SOH SOH-25S

- Excellent performance for shaft displacements and angular deviations
- Low bearing stress
- 1 - 65 Nm, up to 8 000 rpm
- For 1mm to 35mm diameter shafts
- Supplied machined to shaft requirements

### PRODUCT DESCRIPTION

The Oldham coupling from Sungil is a shaft coupling comprising three elements.

These transmit the torque whilst putting low stress on bearings even with angular deviations or parallel and axial displacements between the shafts.

### TECHNICAL DATA

|                       |        |
|-----------------------|--------|
| Angle deviation       | 2 °    |
| Axial displacement    | 0.1 mm |
| Parallel displacement | 2 mm   |
| Torque max            | 5      |
