

**SUNGIL - OLDHAM COUPLING, SOH**  
SOH-16SC

- Excellent performance for shaft displacements and angular deviations
- Low bearing stress
- 1 - 65 Nm, up to 8 000 rpm
- For 1mm to 35mm diameter shafts
- Supplied machined to shaft requirements

**PRODUCT DESCRIPTION**

The Oldham coupling from Sungil is a shaft coupling comprising three elements.

These transmit the torque whilst putting low stress on bearings even with angular deviations or parallel and axial displacements between the shafts.

**TECHNICAL DATA**

<b>Angle deviation</b>	2 °
<b>Axial displacement</b>	0.1 mm
<b>Parallel displacement</b>	1 mm
<b>Torque max</b>	2
