SUNGIL - FLEXIBLE MICROCOUPLING, SFC

SFC-48

- Absorbs large shaft displacements
- Excellent for high shock loads and vibration
- Low moment of inertia
- For 4mm to 16mm diameter shafts
- Supplied machined to shaft requirements

PRODUCT DESCRIPTION

The SFC series is an enormously flexible shaft coupling from Sungil which is ideal in the event of large displacements radially and/or axially.

It is extremely easy to apply thanks to its innovative design.

The SFC series is available for shaft sizes from 6mm up to 12mm as standard.

TECHNICAL DATA

Parallel displacement	2.5 mm
Torque max	1.8
Angle deviation	12 °
Axial displacement	2 mm
