

DEHN TYPE 1 LIGHTNING CURRENT ARRESTERS

DEHNbloc, DEHNSolid, DEHNsecure

951400

- Spark Gap technology
- High lightning discharge capacity
- Direct busbar mount options
- DIN Rail mount Modular variants

PRODUCT DESCRIPTION

Type 1 surge protection (lightning current arrester) are normally the first level of protection for power distribution systems.

They are designed to safely discharge high energy spikes caused by direct lightning strikes to ground.

Type 1 surge protective devices (SPDs) are usually installed in the main power feed to a building or main power distribution system.
