NEO COUPLERS

FW311306CC
Coupler 2P+E 230V Blue

- Robust inline connection ideal for extending or modularising power systems.
- Fast assembly design reducing installation time.
- Reliable strain relief to protect cables under mechanical load.
- Available with screwless or screw terminals to suit any installer.
- Tough housing and strong ingress protection for demanding field use.

PRODUCT DESCRIPTION

NEO couplers provide a robust and reliable inline connection for extending cables or creating modular power systems. Featuring the same ergonomic housing design as the rest of the NEO range, these couplers offer easy assembly and secure strain relief to protect cable connections under load. Available with both screw and screwless connection technology, they support fast wiring even in challenging environments. Their rugged construction and high protection rating make them ideal for construction sites, events, industry and portable power applications.
