NEO PANEL SOCKETS

FW412306CC
Panel Straight 2P+E IP44 230V Blue

- Secure, stable panel-mount design for fixed installations.
- Wide wiring space enabling easier, cleaner cabling.
- Choice of wiring technologies (spring-clamp or screw).
- Consistent protection rating for industrial safety compliance.
- Long service life due to rugged materials and high-quality contacts.

PRODUCT DESCRIPTION

The NEO panel sockets are built for secure installation on distribution boards, control panels and fixed power systems. Their flange-mounted design ensures a tight, stable fit, while the internal layout provides generous wiring space and easy access. Installers can choose between screwless spring-clamp or screw terminal versions to match their preferred wiring method. Thanks to the durable housing, high contact reliability and consistent protection rating, NEO panel sockets offer long-term performance for industrial installations.
