

LUMEL - S4AI ANALOGUE INPUT CONVERTER - 4 CHANNEL

S4AI2100

S4AI, 4xPt,J,K,S $\pm 150\text{mV}$ Inputs, 85-253V ac, 90-300V dc Supply

- Universal or Temperature Inputs
- two programmable alarm outputs
- mathematical functions
- programmable individual characteristics of the inputs
- Modbus Slave Device

PRODUCT DESCRIPTION

The S4AI is a module that can convert 4 analogue inputs, current, voltage, temperature, or resistance into digital RS-485 signals with Modbus protocol.
