IDEM - LOCK FOR GBN-1 CONTACTLESS SWITCHES

210007
GBN-1 (gate bolt, non-contact) Left

- Fits magnetic switches and RFID
- An escape option
- Adapted to four padlocks

PRODUCT DESCRIPTION

The interlock for GBN-1 contactless switches can be installed, for example, in gates to prevent the machine from starting when the operator is in the middle. Operation can use up to 4 padlocks and prevent activation of the switch by moving the handle. Non-contact switches are mounted on an aluminum plate to ensure maximum range.
The lock is intended for use with coded switches: SPC, SMC, SMC-H, LPC, LMC; magnetic SPR, SMR, SMR-H, LPR, LMR as well as RFID: SPF-RFID, LPF-RFID, LPZ-RFID.
