DRAW-WIRE ENCODER SERIES C105

C105.D8.1

- Maximum linearity ±0,1 %
- Working temperature -40°C to +80°C
- Protection level IP65
- Mechanical speed 3m/s

PRODUCT DESCRIPTION

The draw-wire encoder C105 features a compact design. It is available with various wire types. All encoders with 58 mm synchro flange and 6 mm shaft, as well as analog sensors with redundant interfaces can be combined with this draw-wire mechanism. The cable and connector orientations of the encoder can easily be adapted to the position of the mechanism. A flexible wire outlet compensates mounting tolerances.
