

## MDX+ INTEGRATED SERVO MOTOR

MDX Plus - Fully integrated feature-rich servo motor system offering pulse, RS485, CANopen and EtherCAT communication modes

MDXR61G5BRCA000  
 Frame size 60mm, 24Vdc 200W, RS485/CANopen, absolute encoder, with brake, IP20

- Ultra compact servo motor with integrated motion controller
- Supports CANopen, EtherCAT and RS485 communication
- Torque up to 1.8Nm at 3000rpm
- Easy set up with dedicated software
- Options for brake, STO and IP65 protection

### PRODUCT DESCRIPTION

The MDX+ series is a low-voltage fully integrated servo motor system with power range covering 100 to 550W.

These integrated motors include built-in drive and motion controller, and support pulse, RS485, CANopen, EtherCAT communication protocols. Brake and STO features are available as options, with ingress protection to IP65. The MDX+ servo drive is easy to configure over USB with the dedicated free-to-download Luna PC software.

The motors excel in many applications and can greatly reduce the cabling and set-up required on a control system compared to equivalent stand-alone components with associated cabling, typically by 25-50%.

## TECHNICAL DATA

<b>Communication</b>	CANopen, Modbus
<b>Frame size</b>	60 mm
<b>IP class</b>	IP20
<b>Nominal speed</b>	3000 rpm
<b>Nominal torque</b>	0.64
<b>Power</b>	200 W
<b>Supply voltage</b>	24-60 V DC
