

## MBDV DC SERVO MOTOR

MBDV series low voltage DC servo motors, frame sizes from 40-130mm, power range from 100-1500W, IP65 rated

SM0601JEL-KCY-NNV

Frame size 60mm, 24Vdc, 200W, 0.64Nm, 16-bit inc. encoder and 1000-line inc. auxiliary , without brake

- Wide range of frame sizes 40-130mm
- Power outputs from 100-1500W (0.32-4.7Nm)
- Tuneless set up with MBDV controllers and Luna PC software
- Supports CANopen and RS485 comms with wireless AGV option
- IP65 protection with brake and STO options

### PRODUCT DESCRIPTION

MBDV series low voltage DC servo motors, frame sizes from 40-130mm, power range from 100/200/400/750/1000/1200/1300/1500W.

All motors are equipped with 16-bit high-resolution incremental type encoder, divided into single encoder and dual encoder models.

The motors feature a brand-new magnetic circuit design, higher motor efficiency, and are very compact in length compared to competitor products.

IP65 protection level

### TECHNICAL DATA

Communication	CANopen, Modbus
Frame size	60 mm
IP class	IP65
Nominal speed	3000 rpm
Nominal torque	0.64
Power	200 W
Supply voltage	24 V
