POWER SUPPLY 3-PHASE, 36 V DC DIMENSION X SERIES

36 V DC, 26,6 A, semi-regulated

XT40.362
PSU 3PH 480V ac I/P 36V dc 26.6A 960W O/P

- Width 96mm
- Up to 95,5% efficiency
- 125 % power boost
- Suitable for eg. supply for motors

PRODUCT DESCRIPTION

The power supplies in the Dimension X-Series include a new and innovative concept for generating an isolated DC voltage from a three-phase mains system.

A semi-regulated resonant converter enables a very compact design, maximum efficiency and extremely competitive pricing with only a small compromise in the output voltage regulation, output ripple and hold-up time.

Weighing just 1.4 kg, the device provides 960 watts of continuous output power and an additional 25% power reserve for dynamic loads. The light-weight design along with compact dimensions facilitate straightforward mounting on DIN-rail.

Primary use are applications involving supplies to motors, valves and other load circuits with a high power consumption, where an accurate output voltage regulation which is standard on traditional switched-mode power supplies is not required. Furthermore, these switched-mode power supplies can often replace mains transformers with rectifiers.

TECHNICAL DATA

INPUT DATA

Input voltage ac	480 V
Input voltage ac min	432 V AC
Input voltage ac max	528 V AC
Inrush current at 400 V ac typical	4 A
Power factor at 400 V ac, full load. Typical	0.93

OUTPUT DATA

Output voltage	36 V DC
Output voltage min	36 V DC

Output voltage max	36 V DC
Output current	26.6 A
Power	960 W

EFFICIENCY / LIFETIME / MTBF

Efficiency at 400 V ac, full load, typical	95.5 %
MTBF (IEC 61709) 400 V ac, max loan, +40 °C	529000 h

DIMENSIONS

Width	96 mm
Height	124 mm
Depth	159 mm
Weight	1.4 kg

OTHER

Approvals	CB, CE, CSA, UL
Hold time at 400 V ac, typical full load	3 ms
IP class	IP20
Material protection	Aluminium
Supply frequency	50-60 ±6 %
Ripple max	250 mV pp
Series	Dimension X
Power consumption at 400 V ac	1.4 A
Power drop from +60 °C to + 70 °C	24 W/°C
Temperature min without derating	-25 °C
Temperature max without derating	60 °C
Active Transient	Yes

Output Terminals
Large screw terminal

\+ Positive output
\- Negative (return) output

See chapter 12 "Terminals and Wiring" to choose appropriate wire size.

Input Terminals
Screw terminals
L1, L2, L3:
Line inputs
⏚ PE (Protective Earth) input

DC-ok LED (green)
Indicates a normal operation. The LED is on if the output voltage is higher than 32.4V.

Warning LED (yellow)
- A steady-state light indicates an output current higher than the nominal current and that the internal shutdown timer is running.
- A double flash indicates a phase-loss or too low / too high input voltage. (XT40.361: < 3x333Vac or > 3x467Vac XT40.362: < 3x400Vac or > 3x560Vac)
- A fast flash warns of an impending temperature shut-down. A shut-down can be expected within 10 minutes, if the ambient temperature or the load current stays constant.

Shut-down LED (red) and reset button
The red LED flashes when the device has shut down. Pressing the reset button or cycling the input power (10s required) initiates a restart. If the fault has been cleared the device will operate normally.
