

LIGHT BULBS

893004405

LED steady bulb, Clear, 24 V ac/dc, LLL

- Incandescent bulbs
- Halogen bulbs
- LED Flashing and Steady bulbs
- Bulb fitting tools

PRODUCT DESCRIPTION

Incandescent bulbs

Most simple and cost-effective light source, Available in a wide range of shapes, voltages and outputs.

Halogen bulb

Higher light output than incandescent bulbs: up to 25 lm/W. Longer service life (about double that of incandescent bulbs). Little blackening of bulb - same luminous flux throughout the entire service life

LED bulb

High light output - high-power LEDs: up to 200 lm/W, standard LEDs: up to 50 lm/W. LED brightness is reduced only very slightly with coloured lenses as a result of narrow spectrum. Low energy consumption.

Very long service life - up to 100,000 hours. Full resistance to vibrations, impact, shocks, etc.

TECHNICAL DATA

DATA

| | |
|----------------|-------------|
| Lens colour | Transparent |
| IP class | IP40 |
| Light source | LED |
| Light type | White LED |
| Supply voltage | 24 V |
| Mounting | BA15d |
| Weight | 15 g |
| Lamp socket | BA15d |
